

## Bidirectional Power Demo Kit

Bidirectional Power Supply  
with Energy Recycle Function

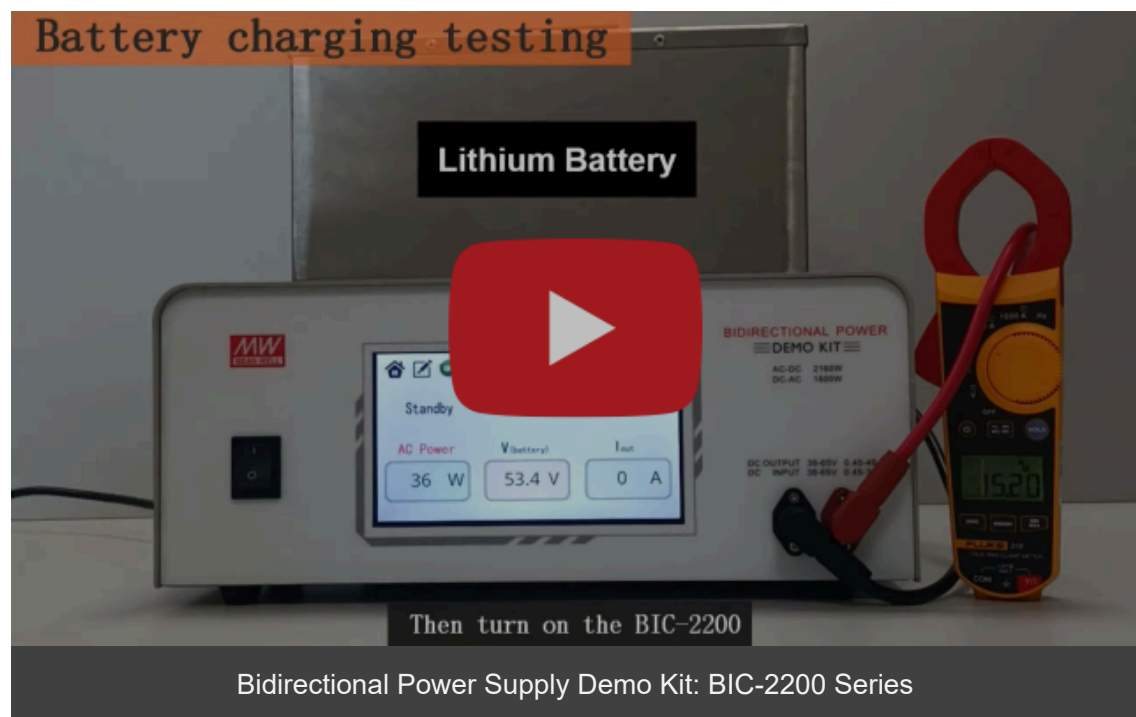

### Bidirectional Power Demo Kit

MEAN WELL's bidirectional power demo kit mainly consists of a BIC-2200-48CAN AC-DC bidirectional power supply with energy recycle function and a PLC serial port screen, integrating power supply and control interface to more conveniently demonstrate the functions and features of BIC-2200. It allows the AC power grid to charge the battery and can also feed the battery energy back into the AC power grid to achieve energy recycling. The size approximately 39\*13\*17 cm, and the handheld grip is designed for easy portability. It can be used for seminars, and promote to the BIC-2200 series at exhibitions and other occasions.

#### Main functions & features:

1. Support lead-acid or lithium battery charging, voltage range: 38~65V
2. Battery charging/discharging mode conversion
3. The output voltage and charging/discharging current are set via the touch screen
4. Power supply/battery status monitoring
5. Battery full charging/battery low voltage protection
6. Support Chinese/English display and online video tutorials
