

## DC High Voltage Centralized Power Supply Demo Kit

With the increasing awareness of environmental protection and the demand for energy-saving and carbon reduction, MEAN WELL launched UHP-1500-HV and NHDD-40 series of DC high voltage products, which are applied to DC high voltage centralized power supply lighting. With DLC-02, they can be integrated into the application of digital lighting and building automation system. In order to better display the functions and applications of MEAN WELL products to the guests, we now introduce the DC High Voltage Centralized Power Supply Demo Kit, which is easy to carry and can be used for product promotion in various exhibitions.
