

BLDC Motor Driver Demo Kit

MEAN WELL's VFD demo kit is a marketing tool for the motor variable frequency drive product line. This kit mainly uses the built-in VFD-350P-230 driver and motor to demonstrate the motor variable frequency drive product line solutions to customers. It can be used for seminars to demonstrate VFD product functions at exhibitions and other occasions. The size is approximately 35*25*12 cm, and the suitcase is designed for easy portability.

Main function & features:

1. Motor start/ stop/ speed/ forward/ reverse control
2. Motor start/ stop/ forward/ reverse rotation indicator
3. Motor speed display
4. Support control board replacement
5. Support external motor control
